

## Geometry Problem Foundation

1. Determine the value of  $x$ .

2. Determine the angles.

3. Determine the value of  $x$ .

4. Determine the angles.

5. Determine the value of  $x$ .

6. Determine the angles.

7. Determine the value of  $x$ , if the perimeter is 300 ft.

8. Determine the length and the width, if the perimeter is 500 ft.

9. Determine the angles.

10. Determine the larger angle.

11. Determine the angles.

12. Determine the larger angle.

13. Determine the angles.

14. Determine the largest angle.

15. Determine the length and the width.

16. Determine the length, if the perimeter is 450 ft.

17. Determine the smallest angle.

18. Determine the smallest angle.

19. Determine the smallest angle.

20. Determine the width, if the perimeter is 400 m.
