

Volume of Revolution by Cylindrical Shells

Revolve a curve or region about the x-axis or y-axis to create a solid in order determine its volume

Shell Method

Revolve the region bounded by the function $y = f(x)$ over $a \leq x \leq b$ about the y-axis

$$V = 2\pi \int_a^b r h dx = 2\pi \int_a^b x f(x) dx$$

Revolve the region bounded by the function $x = g(y)$ over $c \leq y \leq d$ about the x-axis

$$V = 2\pi \int_c^d r h dy = 2\pi \int_c^d y g(y) dy$$

Shell Method

Revolve the region bounded by the functions $y = f(x)$ and $y = g(x)$ over $a \leq x \leq b$ about the y-axis

$$V = \int_a^b r h dx = 2\pi \int_a^b x [f(x) - g(x)] dx$$

Revolve the region bounded by the function $x = g(y)$ and $x = h(y)$ over $c \leq y \leq d$ about the x-axis

$$V = 2\pi \int_c^d r h dy = 2\pi \int_c^d y [g(y) - h(y)] dy$$

Determine the volume of the solid generated by rotating the following regions about the indicated axis.

1. $f(x) = 1 - 2x + 3x^2 - 2x^3$ over $0 \leq x \leq 1$ rotate about the y-axis

2. Region bounded by the curves $f(x) = x(5 - x)$ and $g(x) = 8 - x(5 - x)$
rotate about the y-axis

3. Region bounded by $y = x^2$, $y = 0$, $x = 1$ about the y-axis

4. Region bounded by $y = 3 + 2x - x^2$, $x + y = 3$ about the y-axis

5. Region bounded by $x = \sqrt{y}$, $x = 0$, $y = 1$ about the x-axis

6. Region bounded by $x = 4y^2 - y^3$, $x = 0$ about the x-axis

7. Region bounded by $x + y = 3$, $x = 4 - (y - 1)^2$ about the x-axis

8. Region bounded by $y = x^2$, $y = 0$, $x = -2$, $x = -1$ about y axis.

9. Region bounded by $y = 4x - x^2$, $y = 8x - 2x^2$ about $x = -2$

10. Region under the graph $y = x^2$, $x = y^2$ rotate about the line $y = -1$
